FOOD TECHNOLOGY · STAGE 5

Food for Specific Needs

Teacher program and connected website route map

Cohort	Year 9, Term 2 — Teacher to confirm against older Year 10 program
Authority	Food Technology 7–10 Syllabus (2019) is current to teach in 2026
Candidate	Local integrated course, built 19 August 2026
Release ceiling	Local acceptance only; no publication authority recorded

1. Authority and fact boundary

This program is built from the teacher-provided Student Workbook F4SN v7, the 10-week unit program, nine recipe documents, Classroom classwork and the current 2026 Year 9 assessment handbook. Current Australian government and recognised allergy sources were used to replace or constrain high-risk health claims.

The Food Technology 7–10 Syllabus (2019) remains the current syllabus to teach in 2026. The 2025 syllabus is available for planning in 2026–27 and is scheduled for implementation from 2028; any early implementation is a school decision.

Teacher to confirm

- Year 9 Classroom identity versus Year 10 in the older program PDF.
- 2019 syllabus continuation versus any school-approved early implementation of the 2025 syllabus.
- 2026 practical sequence, ingredient ordering, local hygiene/allergy controls and individual management plans.
- Any current Term 2 formal notification or marking instrument.
- Local authority and permission for any local Aboriginal Cultural Knowledge.

2. Course intent

Students investigate why people have specific food needs, evaluate information, plan respectful and safer food responses, and preserve design evidence in a revisitable folio. Medical and cultural authority boundaries are taught as part of design responsibility.

Outcome alignment

Outcome	Exact syllabus relationship used in this unit
FT5-1	Demonstrates hygienic handling of food to ensure a safe and appealing product.
FT5-2	Identifies, assesses and manages risks of injury and WHS issues associated with handling food.
FT5-5	Applies appropriate methods of food processing, preparation and storage.
FT5-6	Describes the relationship between food consumption, nutritional value and the health of individuals and communities.
FT5-7	Justifies food choices by analysing factors that influence eating habits.

FT5-8	Collects, evaluates and applies information from a variety of sources.
FT5-9	Communicates ideas and information using a range of media and appropriate terminology.
FT5-10	Selects and employs appropriate techniques and equipment for food-specific purposes.
FT5-11	Plans, prepares, presents and evaluates food solutions for specific purposes.
FT5-12	Examines the relationship between food, technology and society.
FT5-13	Evaluates the impact of activities related to food on the individual, society and the environment.

Outcome codes are kept in teacher planning; student pages use learning goals in plain language. Final outcome selection remains subject to the current school program and teacher sign-off.

3. Connected course architecture

Module	Teaching focus	Student evidence
1. Understanding specific food needs	Circumstances; food-choice factors; meal planning	3 knowledge checks (30 questions), 3 saved responses, 3 applied activities, 3 section visuals
2. Culture, belief and food practices	Food taboos; religious and ethical choices; respectful investigation	3 knowledge checks (30 questions), 3 saved responses, 3 applied activities, 3 section visuals
3. Nutrition through the lifecycle	Lifecycle change; adolescent nutrition; lifecycle meal design	3 knowledge checks (30 questions), 3 saved responses, 3 applied activities, 3 section visuals
4. Allergies, intolerance and safer planning	Allergy versus intolerance; labels and cross-contact; diagnosed-need planning	3 knowledge checks (30 questions), 3 saved responses, 3 applied activities, 3 section visuals
5. Modified foods, fibre and support	Modified and fortified foods; dietary fibre; support networks	3 knowledge checks (30 questions), 3 saved responses, 3 applied activities, 3 section visuals

Shared routes: home, activities, project folio, nine-recipe library, validated video library, current assessment boundary and teacher resources. All student responses use the namespace fsn:y9t2 and are stored only in the current browser.

4. Ten-week delivery sequence

Wk	Focus	Learning sequence	Routes	Evidence	Teacher gate
1	Launch specific needs	Circumstance sorter; source boundary; brief	M1 S1	Saved activity + written response	Confirm Year 9 cohort and supplied circumstance cards
2	Food-choice factors and meal planning	Choice-factor matrix; one-day plan	M1 S2–S3	Matrix + meal-plan rationale	Confirm device access and local saving routine
3	Culture, belief and taboos	Stereotype rewrite; ingredient/process audit	M2 S1–S2	Respectful claim + audit	Use local authority for any local Aboriginal content
4	Evidence and lifecycle change	Source ladder; lifecycle map	M2 S3; M3 S1	Source evaluation + stage response	Teacher selects authorised sources
5	Adolescent and lifecycle meal design	School-day pattern; design criteria	M3 S2–S3	Meal concept + criteria	No personal diagnosis, body comparison or supplement advice
6	Allergy and intolerance	Classification; verified-management boundary	M4 S1	Scenario decisions	Apply school emergency and individual-plan procedures
7	Labels and cross-contact	Mock label and workflow audit; practical planning	M4 S2–S3	Control pathway	Teacher confirms practical, labels and controls
8	Modified and fortified foods	Claim-versus-evidence product comparison	M5 S1	Product evaluation	Use current Australian labels
9	Fibre and support networks	Fibre pattern; support map	M5 S2–S3	Pattern improvement + network evaluation	Use population guidance only
10	Folio synthesis and practical evidence	Evaluate against criteria; improvement; backup/export	Folio and course review	Completed folio export	Current formal notification not yet added

5. Teaching and learning method

- Open each section with the named learning goal and purposeful diagram.

- Teach the source or authority boundary before students make a design decision.
- Use the ten-question check for immediate feedback, then move to the saved written response.
- Use the applied activity to turn knowledge into evidence; export or print at the end of the lesson.
- Revisit the folio across the unit rather than treating it as a final-week worksheet.
- Use recipe documents only after current labels, individual plans, practical sequence and local controls are confirmed.

6. Differentiation and adjustments

Need	Planned adjustment	Evidence preserved
Literacy and language	Chunk theory; pre-teach key terms; allow speech-to-text or teacher-approved oral conference.	Saved response or teacher record linked to the same criterion.
Executive function	Use one section and one evidence target at a time; provide the three-part activity structure.	Autosaved staged response and exported checkpoint.
Vision or access	Keyboard-readable navigation, strong contrast, scalable SVG diagrams and printable routes.	Same content in accessible browser or printed form.
Anxiety or medical privacy	Use fictional/supplied scenarios; do not require disclosure of personal diagnoses.	Design evidence without private health details.
Extension	Compare authorities, evaluate conflicting claims or develop more precise criteria.	Annotated source evaluation and refined design response.

7. Safety, health and cultural authority

The course is educational information only. Students do not diagnose, prescribe, recommend supplements, test allergens or override an individual plan. In a suspected severe allergic reaction, follow the person's emergency plan and school procedures and call Triple Zero (000).

Recipes and theory do not certify suitability. The teacher confirms current labels, product formulations, workflow controls and approved equipment. A food that is ingredient-suitable may still be unsafe because of cross-contact or misidentification.

Cultural investigation must recognise diversity within communities and avoid stereotypes. Local Aboriginal Cultural Knowledge is not supplied by this resource and requires local authority and permission.

8. Assessment and evidence boundary

The 2026 Year 9 handbook lists Food Technology class practicals (ongoing, 60%), an assignment (Term 1 Week 10, 20%) and a yearly examination (Term 4 Week 3, 20%). It does not identify a separate formal Food for Specific Needs task in Term 2.

The supplied 2024 Food for Specific Needs notification is retained as historical source evidence only. It must not be issued as the current notification. Current formal notification not yet added.

9. Source register

Source	Authority/use
NESA Food Technology 7–10 (2019)	Current syllabus to teach in 2026.
NESA Food Technology 7–10 (2025)	Planning source; implementation from 2028 unless early implementation is approved.
WWHS Year 9 Assessment Handbook 2026	Current assessment schedule and weighting boundary.
Student Workbook F4SN v7	Teacher-provided learning sequence and task prompts.
10-week unit program	Teacher program source; contains the Year 10 cohort conflict.
Nine teacher recipe documents	Practical source text; 2026 use remains Teacher to confirm.
Eat for Health / NRVs	Australian healthy-eating and fibre population guidance.
Healthdirect / Allergy & Anaphylaxis Australia	Allergy, intolerance, emergency and label-reading boundaries.
FSANZ	Food claims, labelling and fortification information.

10. Review and sign-off

Gate	Status / signature
Cohort and syllabus decision	Teacher to confirm: _____
Practical and allergy controls	Teacher to confirm: _____
Current assessment notification	Not yet added / confirmed: _____
Local content authority	Teacher to confirm: _____
Program approved for use	Name/date: _____
